AI-POWERED PLATFORM

Aspire AI

One AI Platform for Career Growth, Government Services & Healthcare

A unified intelligent ecosystem that connects you to the right career opportunities, government schemes, healthcare resources, and learning paths — all powered by Google Gemini AI.

THE PROBLEM

Opportunities Exist. But They're Invisible.

Fragmented Information

Jobs, government schemes, and healthcare resources are scattered across dozens of platforms with no unified access point.

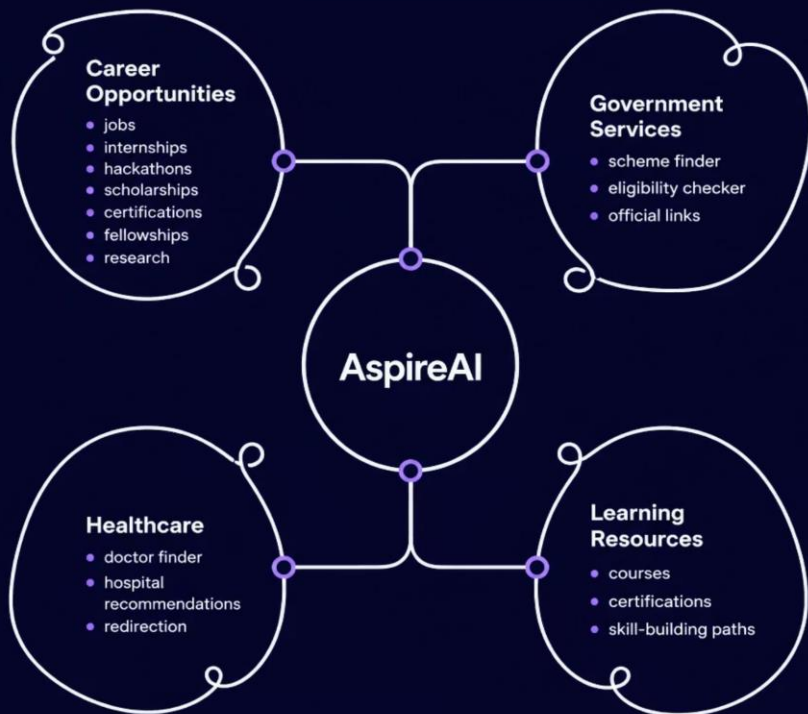

Time-Consuming Research

Users spend hours manually searching, filtering, and verifying eligibility — often with outdated or unreliable results.

Zero Personalization

Generic portals show the same results to everyone, ignoring individual skills, goals, and circumstances.

AspireAI: Your Intelligent Opportunity Engine

AspireAI is a full-stack AI platform that analyzes your profile, resume, and goals — then delivers **personalized, verified recommendations** across three critical life domains.

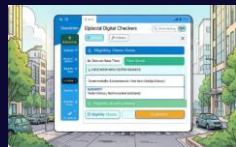

KEY FEATURES

Everything You Need, One Platform

Resume Intelligence

AI-powered resume parsing with skill extraction, gap analysis, and improvement suggestions tailored to your target role.

Government Scheme Finder

Smart eligibility checker that matches you to relevant government programs with direct links to official portals.

Healthcare Module

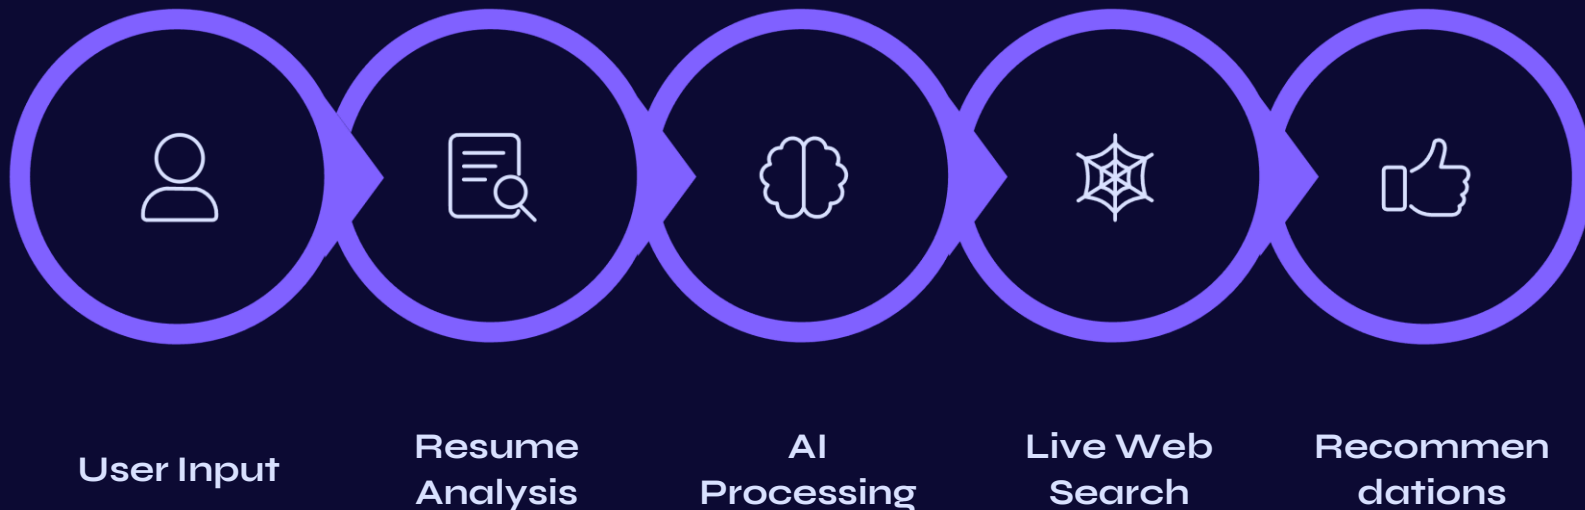

Personalized doctor and hospital recommendations based on location and specialty, with verified website redirection.

Gemini AI Chatbot

Conversational AI assistant answering career, government, healthcare, and learning queries with personalized guidance.

From Input to Opportunity in Seconds

Every step is automated and personalized. AspireAI eliminates manual research by connecting your unique profile directly to verified, live opportunities — with transparent match scores and clear next steps.

Welcome to "AspireAI". As a Senior Tech Recruiter and AI Career Consultant, I have structured this step-by-step roadmap tailored specifically to your background in B.Tech Computer Science Engineering (CSE).

Since you already possess a B.Tech CSE degree and foundational Machine Learning/AI knowledge, your primary objective is to "bridge the gap between theoretical ML and production-grade AI Software Engineering". Modern AI Engineers are fundamentally strong software engineers who know how to build, optimize, and deploy intelligent models at scale.

Here is your "12-Month Detailed Career Roadmap to becoming an AI/ML Engineer".

...

Roadmap Overview

Target Role: AI Engineer / Machine Learning Engineer

Prerequisites (Already Met): CS Fundamentals (DSA, OS, DBMS), Python basics, core ML concepts.

COMMON SYMPTOMS & MEDICAL QUESTIES

Chest Discomfort / Heart Back & Joint Pain High Fever & Cold Stomach Pain & Acidity Headache & Dizziness OPD Booking & Schemes

Hello Shiv Prakash Mishra! I am your AI Healthcare Chatbot. Describe any symptoms, ask about doctor specialties, OPD guidance, or health awareness topics. How can I support your health today?

I have backup

Hello, I am sorry to hear that you are dealing with back pain. Back pain can be very uncomfortable and disruptive to daily life, but it is a very common issue that can often be managed effectively once properly evaluated.

Here is some educational guidance to help you understand your symptoms and figure out the next steps:

...

1. Overview of Back Pain
Back pain can affect people of all ages and can range from a dull, persistent ache to a sudden, sharp, or shooting sensation. Common causes include:
* **Muscle or Ligament Strain:** Often caused by heavy lifting, sudden awkward movements, or poor posture over time.
* **Structural Issues:** Bulging or herniated discs, arthritis, or spinal canal narrowing (stenosis).
* **Lifestyle Factors:** Prolonged sitting, lack of regular exercise, stress, or sleeping on an unsupportive mattress.

Ask about symptoms, medical specialties, OPD booking, or health guidance...

Welcome to "AspireAI". As a Senior Tech Recruiter and AI Career Consultant, I have structured these 5 high-impact interview questions based on real hiring loops at top tech companies and AI labs (OpenAI, Anthropic, Meta, Google, and high-growth AI startups).

Modern AI Engineering candidate evaluations assess three main dimensions:
1. "Generative AI & LLM Architecture" (RAG, Fine-tuning, Latency)
2. "Core Machine Learning Systems & ML Ops" (Drift, Pipelines, Deployment)
3. "Behavioral & Engineering Leadership" (Trade-offs, Incident Management)

Here are the top 5 questions, complete with high-scoring response frameworks.

...

Question 1: System Design (GenAI / RAG)
> "How would you design a Retrieval-Augmented Generation (RAG) system for an enterprise search tool across 10 million documents that guarantees sub-500ms latency while minimizing hallucinations?"

...Category: Technical / System Design
What Interviewers Look For: Knowledge of vector databases, chunking strategies, hybrid search, reranking, caching, and latency optimization techniques (e.g., vLLM, semantic caching).

Shiv Prakash Mishra

AI Engineer

Built for Speed, Scale & Intelligence

React.js + Tailwind CSS

Responsive, glassmorphism UI with component-driven architecture for a premium user experience.

FastAPI

High-performance Python backend with async support, handling AI inference and API orchestration.

Google Gemini API

Multimodal AI for resume parsing, natural language understanding, and personalized recommendation generation.

Tavily Search API

Real-time web search ensuring all opportunities, schemes, and healthcare data are current and verified.

Every Path, One Platform

Education

Scholarships, certifications, research opportunities, and fellowships matched to your profile.

Employment

Internships, full-time jobs, and competitions ranked by AI match score.

Challenges

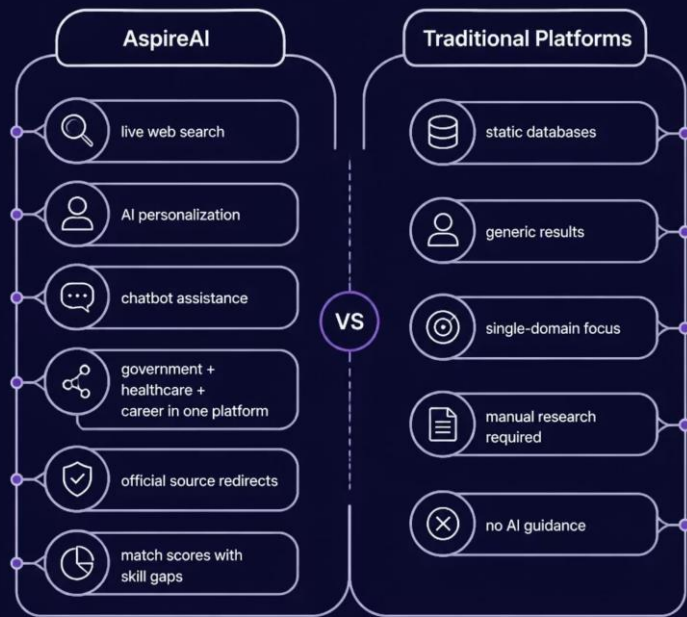

Hackathons, coding competitions, and innovation challenges aligned with your skills.

Learning

Curated courses and resources to close skill gaps and accelerate growth.

Competitive Advantages That Set Us Apart

Real-World Impact

AspireAI doesn't just aggregate — it **acts**. By combining live search, AI reasoning, and official redirects, it delivers outcomes, not just information.

Live, Verified Data

No stale listings — Tavily ensures real-time accuracy

Thank You

TEAM: CODE TITANS

One AI Platform for Career Growth, Government Services & Healthcare

<https://github.com/ShivPrakashMishra/Aspire-AI.git>

- ❑ **Future Scope:** Multi-language support, mobile app, employer dashboard, government API integrations, and predictive career path modeling.

A vibrant cosmic background with a dark purple and blue gradient. It features numerous bright, multi-colored stars (pink, blue, yellow) and streaks of light radiating from the center, creating a sense of depth and movement. The words "THANK YOU" are prominently displayed in the center in a large, bold, 3D-style font with a pink-to-blue gradient and a glowing outline.

THANK
YOU
